### **Reason for Allowance**

The following is an examiner's statement of reasons for allowance: None of the prior art of record alone or in combination teaches or fairly suggest applicant's claimed invention.

Particularly, independent claim 1 claims among other things a "a plurality of discs fixed adjacent an upper end of the plurality of transparent strips, the margin highlighter including a luminescent or fluorescent agent in sufficient concentration to provide a visible light emission in the event of lighting failure" which is not taught or suggested by the prior art of record.

Independent claim 6, claims among other things "wherein the margin highlighter comprises a plurality of vertically elongated bars fixed adjacent an upper end of the plurality of transparent strips extending a downward from the curtain-holding apparatus by less than about 30 cm to highlight the passage upper margin" which is not taught or suggested by the prior art of record.

Independent claim 8, claims among other things "the margin highlighter comprises a plurality of elements containing the luminescent or fluorescent agent, the elements being secured to one of the laterally outermost strips of the curtain system, the plurality of elements being positioned relative to each other so as to maintain sufficient visibility through the strip to observe any occurrence of movement" which is not taught or suggested by the prior art of record.

Independent claim 12, claims among other things "emission in the event of lighting failure, and a curtain strip suspended from the curtain-holding apparatus, the curtain strip including a plurality of elements containing the luminescent or fluorescent agent, the elements being secured to one of the laterally outermost strips of the curtain system, the plurality of elements being positioned relative to each other so as to maintain sufficient visibility through the strip to observe any occurrence of movement" which is not taught or suggested by the prior art of record.

Independent claim 19 claims among other things "structure having a back surface to retain the flexible transparent strips in coupled relation to the pegs, and a buffer for preventing direct interaction between the flexible transparent strips and a back surface of a retaining structure, the buffer including a luminescent or fluorescent agent in sufficient concentration to provide a visible light emission in the event of lighting failure" which is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
